November 2020 Newsletter

Our news

As we now return to national lockdown, although we had started resuming face-to-face training and were getting several enquiries about it, we now cannot do any more face-to-face training until December 3rd. If you want to book in face-to-face training for after that date, please feel free to do so; if it has to be cancelled at short notice for COVID reasons, there will be no charge for rescheduling.

We are still doing a lot of remote training, using Microsoft Teams, WebEx and Zoom, either tailored to the needs of the individual or company, or in a group session. Some people prefer to learn in this way as training can be done in small chunks, rather than spending a whole day at a time. Also, if you are struggling with anything computer-related, please do not hesitate to get in touch and we will give help and advice if we can.

A recent study has shown that a lot of employees are feeling that COVID-19 is derailing their career growth and that **nearly half of employees don't feel like they're getting enough training, coaching, or mentoring to advance their careers.** We can help with **tailored training for individuals or a group.**

To see the list of November scheduled sessions, see further down this newsletter. Sessions are updated regularly - please see <http://www.jmdtraining.co.uk/online-training> for most up-to-date availability - once there are 6 attendees, the session will be closed to further attendees and a new one scheduled.

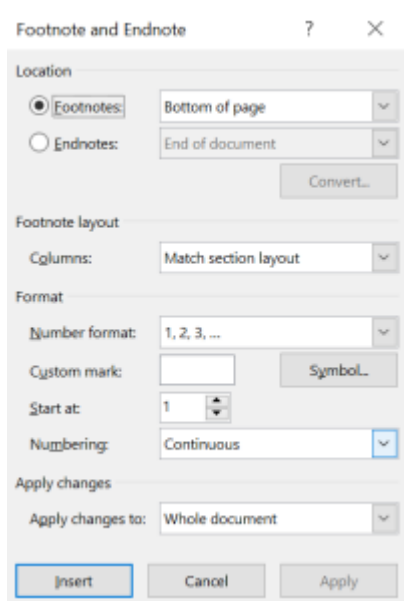

Hints and Tips

I have included a couple of my recent blog posts - see <http://ifonlyidknowthat.wordpress.com> - from questions that have risen whilst training recently.

Microsoft Word - Changing footnote numbering on each page

Usually when you create footnotes in Microsoft Word, they are numbered sequentially throughout the document.

I was asked, however, if it is possible to change footnote numbering on each page. Yes, you can. To do so, on the **References** tab, in the **Footnotes** group, click the **Footnotes** dialog box launcher . The **Footnote and Endnote** dialog box will be displayed.

Towards the bottom of the dialog box, where it says **Numbering**, click on the dropdown. Options include **Continuous**, **Restart each section** or **Restart each page**.

If you want to change the footnote numbering so that on each page they start with **1**, click **Restart each page**.

Click **Apply**.

Microsoft Excel - month name from a date

I was at a local client earlier this week – face-to-face training at last after so much time. They had entered dates in two columns – one for months and the other for years. Since they wanted to be able to use pivot tables and also chart the data, they wanted to create two extra columns – one with the date in m/yy form and one with the month name itself.

To create the date in m/yy format, I used the formula

=B2&"/"&A2

	A	B	C	D	E
1	Year	Month	Date	Monthname	
2	2019	1	=B2&"/"&A2		
3	2019	1	1/2019		
4	2019	1	1/2019		

I set the format to **Date** from the **Number** group on the **Home** tab, then double-clicked down with the left hand mouse button to get all the dates.

To get the month name itself, I used the formula

=TEXT(C2,"MMMM")

	A	B	C	D	E	F
1	Year	Month	Date	Monthname		
2	2019	1	1/2019	=TEXT(C2,"MMMM")		
3	2019	1	1/2019	January		
4	2019	1	1/2019	January		
5	2019	2	2/2019	February		
6	2019	2	2/2019	February		

This gives the full month name, i.e. January etc. If I had only wanted Jan, Feb, then the formula would be

=TEXT(C2,"MMM")

Online Training Sessions

Since some organisations no longer want face-to-face training, we are pleased to be able to announce some interactive short training sessions.

Sessions will be conducted using WebEx or Zoom and will be limited to 6 people. Once a session is full, new dates will be released.

Training files and a meeting invitation will be sent out to participants in advance of the training session. Sessions are updated regularly [here](#).
